

Luke,

I really enjoyed your erosion training class that I attended to earn my Level 1B Advanced Fundamentals certification.

It's obvious that you have relevant experience and that you are not just teaching out of a book. I liked that you kept the pace moving with a lot of interaction, videos and demonstrations. It helped to keep my attention throughout the course. Your demo and explanation of the inspection process was especially helpful for me.

Your list of classes and schedules on your website made it easy for me to choose a date and location that were convenient. I also enjoy reading your newsletters for updates and more information about erosion control. I would definitely recommend your classes to anyone who was interested in learning more about erosion control and the inspection process.

Thank you,

Jason Vaughn, P.E.  
Project Engineer
